RE: Reconnaissance Level Characterization Report (RLCR)/Pre-Demolition Survey Report (PDSR) for Buildings 566 & 566A and Facility Disposition RSOP Notification – Concurrence, Approval, and Agreement

Dear Mr. Legare:

The Colorado Department of Public Health and Environment, Hazardous Materials and Waste Management Division has reviewed the RLCR/PDSR for Buildings 566 and 566A, Version 0 dated December 3, 2003, and the Facility Disposition RSOP Notification letter dated December 9, 2003. Based on the information contained in this RLCR/PDSR, we hereby concur with the designation that Buildings 566 & 566A are Type 2 Facilities and approve the PDSR for Buildings 566 & 566A.

We also agree with the utilization of the Facility Disposition RSOP, with implementation of appropriate measures to protect the remaining contaminated material and equipment. It is our understanding that the contaminated trench will be coated with a fixative, filled with gravel and covered with plywood to prevent releases during demolition activities, and it will be saw cut out after removal of the building debris. It is also our understanding that the remaining section of potentially contaminated PWL in the SE corner of the Building will be filled with epoxy or grout prior to demolition of the building to prevent release of contamination. In addition, the contaminated Tanks located in the NW corner of the buildings will be internally coated with fixative and properly protected during demolition to prevent releases of contamination during demolition.
